

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A gun rest comprising:

a front base comprising a front fork and a first plurality of supports separated by a first support distance;

a rear base comprising a rear fork and a second plurality of supports separated by a second support distance; and

a ~~couple~~ coupler for securing the said front base to the rear base, said coupler permitting said front base and said rear base to pivot relative to each other so that said first plurality of supports and said second plurality of supports can lie in different planes;

said second support distance being less than said first support distance and said first plurality of supports each comprise at least one support point of contact and said second plurality of supports also each comprise at least one support point of contact such that said gun rest is supported by at least four points of contact.

2. (Original) The gun rest as recited in claim 1 wherein said front base and said rear base are molded from a polymer.

3. (Currently Amended) The gun rest as recited in claim 1 wherein said rear base is detachable comprises a member that is received in the front base so that it can be detached from said front base to facilitate using the front base as a handgun support.

4. (Currently Amended) The gun rest as recited in claim 1 wherein said rear base comprises a tubular member that is received in an area of said front base and can telescope in and out of said front base.

5. (Original) The gun rest as recited in claim 4 wherein said front base and said rear base are molded from a polymer.

6. (Currently Amended) The gun rest as recited in claim 5 wherein said rear base is detachable comprises a member that is received in the front base so that it can be detached from said front base to facilitate using the front base as a handgun support.

7. (Original) The gun rest as recited in claim 6 wherein said rear base telescopes in and out of said front base to vary a distance between said front and rear forks.

8. (Currently Amended) The gun rest as recited in claim 1 wherein said first plurality of supports lie in first plane and said second plurality of supports lie in a second plane, said first and second planes being generally perpendicular to an axis of said gun rest.

9. (Original) The gun rest as recited in claim 1 wherein said gun rest weighs less than about 5 pounds.

10. (Original) The gun rest as recited in claim 1 wherein at least one of said front and rear forks is adjustable.

11. (Currently Amended) The gun rest as recited in claim 7 wherein said first plurality of supports lie in a first plane and said second plurality of supports ~~lay~~ lie in a second plane, said first and second planes being generally perpendicular to an axis of said gun rest.

12. (Original) The gun rest as recited in claim 7 wherein said gun rest weighs less than about 5 pounds.

13. (Currently Amended) The gun rest as recited in claim 7 wherein at least one of said front and rear forks is adjustable so that it can move toward or away from said front base or said rear base, respectively.

14. (Original) The gun rest as recited in claim 1 wherein said front base comprises a planar area for providing a handgun support.

15. (Original) The gun rest as recited in claim 1 wherein at least one of said front base or said rear base comprises a molded handle.

16. (Original) The gun rest as recited in claim 1 wherein said first support distance is at least 18 inches and said second support distance is at least 5.6 inches.

17. (Currently Amended) A gun rest comprising:

 a support having a first base having a first fork and further comprising a first plurality of supports and a second base having a second fork and further comprising a second plurality of supports, and

 a coupler for coupling said first and second bases so as to permit the first base to lie in a first plane and said second base to lie in a second plane, said first and second plurality of supports being arranged to define a trapezoid and said support being molded from a polymer; wherein said first plurality of supports each comprise at least one support point of contact and said second plurality of supports also each comprise at least one support point of contact such that said gun rest is supported by at least four points of contact.

18. (Original) The gun rest as recited in claim 17 wherein said first base and said second base are molded from a polymer.

19. (Original) The gun rest as recited in claim 17 wherein said second base is detachable from said first base to facilitate using the first base as a handgun support.

20. (Original) The gun rest as recited in claim 17 wherein said second base telescopes in and out of said first base.

21. (Original) The gun rest as recited in claim 20 wherein said first base and said second base are molded from a polymer.

22. (Original) The gun rest as recited in claim 21 wherein said second base is detachable from said first base to facilitate using the first base as a handgun support.

23. (Currently Amended) The gun rest as recited in claim 22 wherein said second base comprises a member that telescopes in and out of said first base to vary a distance between said first and second forks.

24. (Currently Amended) The gun rest as recited in claim 17 wherein said plurality of supports lie in first plane and said second plurality of supports ~~lay~~lie in a second plane, said first and second planes being generally perpendicular to an axis of said gun rest.

25. (Original) The gun rest as recited in claim 17 wherein said gun rest weighs less than about 5 pounds.

26. (Currently Amended) The gun rest as recited in claim 17 wherein at least one of said first and second forks is adjustable so that it can move toward or away from said first base or said second base, respectively.

27. (Original) The gun rest as recited in claim 23 wherein said first plurality of supports lie in first plane and said second plurality of supports lie in a second plane, said first and second planes being generally perpendicular to an axis of said gun rest.

28. (Original) The gun rest as recited in claim 23 wherein said gun rest weighs less than about 5 pounds.

29. (Currently Amended) The gun rest as recited in claim 23 wherein at least one of said first and second forks is adjustable so that it can move toward or away from said first base or said second base, respectively.

30. (Original) The gun rest as recited in claim 17 wherein said front base comprises a planar area for supporting a butt of a handgun.

31. (Original) The gun rest as recited in claim 17 wherein at least one of said front base or said rear base comprises a molded handle.

32. (Original) The gun rest as recited in claim 17 wherein a distance between said first plurality of supports is at least 18 inches and a distance between said second plurality of supports is at least 5.6 inches.

33. (Currently Amended) The gun rest as recited in claim 1 wherein said coupler comprises a clamp for clamping the first base to the second base.

34. (Original) The gun rest as recited in claim 17 wherein said first plane is the same as said second plane.

35. (Original) The gun rest as recited in claim 17 wherein said first and second planes are different.

36. (Cancelled)
